

Advanced Java (Servlets & JSP) Interview Questions

1. What is a servlet in Java?

Cross Q1: How is a servlet different from a normal Java class?

Cross Q2: Who creates the servlet object and manages its lifecycle?

2. Explain the servlet lifecycle.

Cross Q1: What is the role of `init()`, `service()`, and `destroy()`?

Cross Q2: Can `init()` be called manually?

3. What is the difference between `doGet()` and `doPost()`?

Cross Q1: Which method is more secure for form data?

Cross Q2: Can both methods be called in the same servlet?

4. How does the `web.xml` file work in a servlet-based application?

Cross Q1: What is the difference between `servlet-name` and `servlet-class`?

Cross Q2: How do you configure `init` parameters in `web.xml`?

5. What is the difference between `RequestDispatcher` and `sendRedirect()`?

Cross Q1: Which one is handled on the server-side?

Cross Q2: Can you transfer request attributes using `sendRedirect()`?

6. What are cookies in servlets?

Cross Q1: How do you create and retrieve cookies in a servlet?

Cross Q2: What are the security risks of using cookies?

7. What is `HttpSession` in Java?

Cross Q1: How do you create and destroy a session?

Cross Q2: What happens if cookies are disabled in the browser?

8. How is session tracking done in servlets?

Cross Q1: Compare cookies, URL rewriting, hidden fields, and `HttpSession`.

Cross Q2: Which session tracking method is most secure and why?

9. What is a filter in servlet programming?

Cross Q1: What interface is used for creating a filter?

Cross Q2: Can filters be chained? How?

10. What are listeners in servlets?

Cross Q1: What is the purpose of `ServletContextListener`?

Cross Q2: How can you track session creation using listeners?

11. What is the difference between ServletContext and ServletConfig?

Cross Q1: Which one is application-wide?

Cross Q2: How do you access ServletConfig inside a servlet?

12. How can you handle form data in servlets?

Cross Q1: How do you retrieve request parameters?

Cross Q2: What happens if the parameter name is incorrect in `getParameter()`?

13. What is the use of annotations like `@WebServlet`?

Cross Q1: Can annotations replace `web.xml`? Any limitations?

Cross Q2: Can you define init parameters using annotations?

14. What is JSP and how is it different from Servlets?

Cross Q1: What does a JSP get compiled into?

Cross Q2: When would you prefer servlets over JSP?

15. What are scriptlets in JSP?

Cross Q1: Why are scriptlets discouraged in modern JSP?

Cross Q2: What are alternatives to scriptlets?

16. What is the use of JSP Expression Language (EL)?

Cross Q1: How do you access JavaBean properties using EL?

Cross Q2: Can you access request/session attributes using EL?

17. What is the difference between include directive and `jsp:include` action?

Cross Q1: Which one includes content at compile-time?

Cross Q2: Which one allows dynamic content updates?

18. What are JSP implicit objects?

Cross Q1: What are request, response, session, and application?

Cross Q2: Can you access database connection from a JSP using implicit objects?

19. What is JSTL (JSP Standard Tag Library)?

Cross Q1: Name commonly used JSTL core tags.

Cross Q2: How is JSTL better than scriptlets?

20. How can you connect a JSP/Servlet to a database?

Cross Q1: What are the steps to load a JDBC driver and execute a query?

Cross Q2: How do you manage database connections efficiently in a servlet?

21. What are JavaBeans in JSP?

Cross Q1: How do you declare and use a bean in JSP?

Cross Q2: What are the naming conventions of getter/setter in JavaBeans?

22. What are the different scopes available in JSP?

Cross Q1: Difference between page, request, session, and application scope?

Cross Q2: When would you use session scope vs application scope?

23. What is page directive in JSP?

Cross Q1: What are some common attributes of @page directive?

Cross Q2: How do you import Java packages using it?

24. How do you perform exception handling in servlets and JSP?

Cross Q1: How do you define an error page in JSP?

Cross Q2: How do you handle uncaught exceptions in a servlet?

25. How does the MVC pattern work in servlet and JSP applications?

Cross Q1: What roles do servlets and JSP play in MVC?

Cross Q2: How do you forward data from servlet to JSP using request attributes?

=====
